GUÍA DE DESARROLLO MODULAR / PSP / MVC

1. El presente estandar sirve para desarrollar un proyecto bajo la programación modular dentro del Proceso Personal de Desarrollo de Software usando el Modelo Vista Controlador.
2. Como requerimientos previos al desarrollo se necesita:
    a. Desarrollar el diseño conceptual del módulo que permita conocer de manera general una planeación de la parte a desarrollar, así como embonará en el proyecto final.
    b. Genera un proyecto en PSP Dashboard en la versión 2.1, que permita gestionar el Desarrollo del Proyecto del Software en este Módulo.
3. Seguir la siguiente guía de Entregables:
